PrintPack

Printer combination for tt7000

With the PrintPack t+t netcom offers a handy and robust PDA printer combination for the handheld series tt7000.

The GeBE printer GPT 4454 with 114 mm paper width is a 4" thermal printer which meets the highest requirements. The printer can be operated by battery and/or with an external adaptor. With high- quality print and a wide range of fonts and graphics the printer has a speed of 50 mm/s. The printer is connected by infrared.

The tt7000 and the printer are conveniently stored in a sturdy padded bag and are well protected during transport. Beside the printer battery is also enough space for a paper spare roll.

The PrintPack has an optional magnetic card reader stored in a separate slot on one side of the bag.
